

The senior management and all personnel of Boniface Engineering Ltd are committed to the principles of responsible environmental stewardship and sustainability.

Our aims are to ensure:-

1. Our company is committed to establishing and maintaining compliance with all relevant statutory, local and national environmental laws and other requirements.
2. Our Management System operates to the requirements and principles of ISO 14001:2015.
3. Our employees all play a part in contributing to the company's efforts to meet our commitment to fulfil compliance obligations, enhance environmental performance and sustainability, prevent pollution and to protect the environment.
4. Our Environmental Policy and its objectives are actively and effectively communicated to all our employees, all our subcontractors who work with us and is available for public review.
5. Our management system has a dedicated resource for the operational management of our Management System and the support of Boniface Engineering Ltd.
6. Our Management System identifies and establishes the significant aspects and impacts of our operations in Thetford, Norfolk. These are considered along with technological options, financial, operational and business requirements plus the views of interested parties before being translated into environmental objectives, aims and targets for Boniface Engineering Ltd.
7. Our Management System is continuously assessed and improved for its effectiveness and performance. Wherever possible solutions will be sought that promoting sustainable procurement, minimisation of waste and adoption of re-use and recycling techniques.
